Breaking Down Chemistry CRT Study Guide Answers

Atomic Structure and Periodicity

Understanding atomic fundamentals is central to chemistry. Study guides typically include questions on:

- Atomic number, mass number, and isotopes
- Electron configurations

- Periodic table trends (atomic radius, electronegativity, ionization energy)

Sample Question & Explanation:

Q: What is the electron configuration of a neutral oxygen atom?

Answer: $1s^2 2s^2 2p^4$

Explanation: Oxygen has 8 electrons. The configuration fills the 1s orbital (2 electrons), then 2s (2 electrons), and finally 2p (4 electrons). Recognizing electron configurations helps with understanding bonding and reactivity.

Chemical Bonding and Molecular Geometry

Questions often test:

- Types of bonds: ionic, covalent, metallic
- Lewis structures and VSEPR theory
- Polarity and intermolecular forces

Sample Question & Explanation:

Q: Draw the Lewis structure for CO₂ and determine its molecular shape.

Answer: Linear

Explanation: Carbon is the central atom with two double bonds to oxygen atoms. VSEPR theory predicts a linear shape because of the two bonding pairs and no lone pairs on the central carbon atom.

Stoichiometry and Chemical Reactions

This section emphasizes quantitative reasoning:

- Balancing chemical equations
- Mole conversions
- Limiting reactants and percent yield

Sample Question & Explanation:

Q: How many moles of water are produced when 2 moles of hydrogen gas react with excess oxygen?

Answer: 2 moles

Explanation: The balanced equation is $2\text{H}_2 + \text{O}_2 \rightarrow 2\text{H}_2\text{O}$. The mole ratio of H_2 to H_2O is 1:1, so 2 moles of hydrogen produce 2 moles of water.

Thermodynamics and Kinetics

Questions may involve:

- Enthalpy, entropy, Gibbs free energy
- Activation energy and reaction rates

Sample Question & Explanation:

Q: If a reaction has a negative ΔG , what does this indicate about the reaction?

Answer: It is spontaneous

Explanation: A negative Gibbs free energy change signifies that the reaction can proceed without external energy input under the given conditions.
