Sample Eco 202 Assessment Test Questions and Answers

Below are examples of typical questions with brief explanations of the answers to illustrate how to approach them.

Question 1:

What is the law of demand?

Answer:

The law of demand states that, all else being equal, there is an inverse relationship between the price of a good and the quantity demanded. As price decreases, demand tends to increase, and vice versa.

Question 2:

Calculate the price elasticity of demand if the price drops from \$10 to \$8, and quantity demanded increases from 50 units to 70 units.

Answer:

Elasticity = (% change in quantity demanded) / (% change in price)

- % change in quantity demanded = $[(70 - 50) / 50] 100 = 40\%$
- % change in price = $[(8 - 10) / 10] 100 = -20\%$
- Elasticity = $40\% / -20\% = -2$

Since the absolute value is 2, demand is elastic.
